

## CLAIMS

What is claimed is:

- 1        1.        A system for commanding an entity, comprising:
  - 2                    an entity player for invoking an entity, wherein the entity includes
  - 3                    a plurality of methods;
  - 4                    an entity editor connected to the entity player; and
  - 5                    at least one control device connected to the entity player,
  - 6                    wherein the entity player invokes the entity methods in accordance with
  - 7                    the control device.
- 1        2.        A method for commanding an entity, comprising:
  - 2                    selecting an entity wherein the entity includes a plurality of
  - 3                    commands that are associated with the entity; and
  - 4                    selecting at least one entity command.
- 1        3.        The method of claim 2, wherein the step of selecting the entity
- 2                    commands is performed through the use of an entity editor.
- 1        4.        A method for commanding an entity, comprising:
  - 2                    downloading an entity, wherein the entity is associated with a
  - 3                    plurality of commands;
  - 4                    opening the entity in an entity editor to determine the plurality of
  - 5                    commands associated with the entity;
  - 6                    selecting at least one command; and
  - 7                    constructing a message from the selected command.

- 1           5.     A method for interpreting an entity, comprising:
- 2                 retrieving, by an entity-enabled device, an entity having a
- 3                 plurality of commands wherein the entity-enabled device includes an
- 4                 entity player for interpreting commands;
- 5                 determining, by the entity player, whether the commands are
- 6                 compatible with the entity-enabled device;
- 7                 interpreting, by the entity player, the compatible commands on
- 8                 the entity-enabled device.
